PROFESSIONAL SUMMARY

Full Stack Engineer with 3 years of professional experience building and deploying production web and mobile applications. Built and maintained 10+ production applications spanning frontend, backend, mobile, and cloud infrastructure, with hands-on experience in React, Next.js, Node.js, TypeScript, databases, caching, microservices, and CI/CD.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript
- **Frontend:** React.js, Next.js, React Native, Redux Toolkit, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, WebSockets
- **Databases & Caching:** PostgreSQL, MongoDB, Redis
- **Cloud & DevOps:** AWS, GCP, Docker, GitHub Actions, NGINX
- **Architecture:** Microservices, Modular Monolith
- **Integrations:** Third-Party APIs, Payment Gateways, Webhooks, Stripe, OpenAI, Twilio

PROFESSIONAL EXPERIENCE

Full Stack Developer | Phymes Pty Ltd (Remote, Australia)

09/2025 - 04/2026

- Led frontend development for a 3-person engineering team, establishing reusable component standards, guardrails, and shared engineering documentation adopted across a 12-engineer organization, reducing developer onboarding time from 3 weeks to 2 weeks (~33%).
- Built 2 production full-stack applications and 5 microservices using Node.js, Express.js, TypeScript, PostgreSQL, and React Native; implemented JWT-based RBAC and Stripe payment workflows while reducing API response times to under 50ms through query optimization and Redis caching.
- Built a cross-platform React Native application for iOS and Android using a reusable, feature-based architecture; containerized 5+ backend services with Docker and streamlined CI/CD using GitHub Actions and Google Cloud Run.

Software Engineer | Tech Ventures Group (Remote, USA)

09/2023 - 08/2025

- Built and maintained 8+ production web applications across SaaS, operations, finance, and HR, including platforms used by employees at Frontier Toyota; delivered 100+ REST APIs and reduced average page load time from 2.5s to 0.8s (~68%) through Redis caching, code splitting, and dynamic loading.
- Built React Native applications for iOS and Android with offline support and real-time data synchronization for field operations; owned production infrastructure across web and mobile backend services, including VPS, NGINX, SSL/TLS, deployments, and CI/CD.
- Built AI-powered customer support systems using OpenAI APIs and Twilio Voice Agents, reducing manual support effort by ~35%; migrated 15+ background jobs from cron scripts to Trigger.dev, improving job success rate from 92% to 99.5% and saving 5+ hours of manual intervention per week.

Full Stack Developer Intern | AZtec Automation Solutions (Noida, India)

06/2023 - 08/2023

- Built AZtec's corporate website (frontend and Express.js backend) and rebuilt the website for DIAC, AZtec's subsidiary, migrating it from legacy PHP to Next.js; deployed both to production on a VPS. Live: aztec-automation.com | diac.co.in
- Owned on-page SEO for both sites and worked directly with the marketing and graphic design teams through design handoff and launch.

FEATURED PROJECTS

House of CB — E-commerce Web Application Redesign | [Live Demo](#)

- Redesigned and developed a responsive e-commerce application using Next.js, reusable components, and mobile-first architecture.
- Improved frontend performance through code splitting, lazy loading, asset optimization, and scalable component architecture.

SnapLink — Open-Source Production-Ready URL Shortener | [GitHub](#) | [Live Demo](#)

- Built an open-source URL shortener using Node.js, Express.js, TypeScript, MongoDB, and Redis, featuring authentication, custom aliases, expiration, analytics, QR generation, rate limiting, and caching.
- Containerized and deployed using Docker, GitHub Actions, GitHub Container Registry (GHCR), AWS EC2, and NGINX with HTTPS; implemented automated testing with Vitest/Supertest and monitoring with Prometheus/Grafana.

EDUCATION

Bachelor of Arts, Mahatma Gandhi Post Graduate College

2020 - 2023

Full Stack Development Training, Masai School | [Certificate](#)

2022 - 2023
